

Liberty Utilities - Empire District encourages customers to use energy saving tools to lower their usage and control their bills. Utilizing light-emitting diodes (LEDs) is an easy smart energy solution.

THE BENEFITS OF LEDs INCLUDE

- Consume up to 90% less energy
- Last up to 25x longer than incandescent bulbs
- 100% recyclable

Replacing a standard 60-Watt incandescent bulb with a 9-Watt LED offers an estimated potential lifetime savings of as much as \$206 and 1825 kWhs in energy savings.

Liberty Utilities - Empire District residential customers in Arkansas can receive a complimentary three-pack of LEDs simply by filling out the survey information and returning the card to the company by August 31, 2018. These 9-watt bulbs will replace 60-watt incandescent bulbs. For more information about energy saving programs offered by Liberty Utilities - Empire, visit www.empiredistrict.com and click on the Smart Energy Solutions tab.

HURRY SUPPLIES ARE LIMITED!

LEDs are available on a first-come, first-served basis. Customers who indicate they are not interested in LEDs will not receive a complimentary three-pack.
