Downed Power Lines Safety Tips

- ✓ Stay away from power lines. They are bare wires and not insulated. Downed power lines may appear to be harmless but could be energized and dangerous.
- ✓ If a person or object is in contact with a power line, do not touch the person, object, or line. The electric current could flow through to you. Call 911 and Liberty Utilities at 800-206-2300 immediately.
- ✓ If your vehicle is in contact with a power line, stay inside the car. Warn others not to touch the car or the power line.
- ✓ If you must leave your vehicle, jump clear to avoid being in contact with the car and the ground at the same time.

Call Liberty Utilities at 1-800-206-2300 to report outages, flickering lights, downed lines, or other electrical problems. You can also report your outage online via MyAccount.
